COMMUNITY HEALTH STATUS REPORT

Mobilizing Action Through Planning and Partnerships-SEARHC
Community Transformations Grant

FY13
The Community Health Status Report was the third assessment area. This assessment answers the questions, “How healthy are our residents?” and “What does the health status of our community look like?” The results of the assessment provide the MAPP Steering Committee with an understanding of the community’s health status and ensure that the community’s priorities include specific health status issues (e.g., high lung cancer rates or low immunization rates).
