PRESS RELEASE

Date: November 23, 2021
From: Petersburg Medical Center

Active case count: Petersburg Medical Center **reports 10 additional cases** today which brings our active case count to 68.

PMC providers continue to see COVID positive patients who present later in their illness with more severe disease. Emergency room evaluation and admissions have increased considerably in the past 10 days.

Home antigen testing kits are available at Rexall Drugs, Public Health and the Joy Janssen Clinic. If you test positive with a home antigen test, you are urged to isolate immediately and notify your close contacts.

Follow up with your provider during clinic hours unless you have concerns about symptoms. The Covid line is your resource for symptom management, test and vaccine scheduling at 907-772-5788.

Vaccine: Pediatric doses, ages 5-11 are approved and PMC has began administering those vaccines. Please call PMC COVID hotline (907-772-5788) to be placed on the wait list. All three COVID-19 vaccines are available in Petersburg for adults. To schedule your first, second, or third dose call PMC (907-772-5788) or Public Health (907-772-4611).

Thank you to you, the Petersburg Community, for testing, distancing, masking, and getting vaccinated. We are better together when we work together!
