

# Petersburg Medical Center

Your hospital bill should never be a surprise, but it can be hard to predict what is needed to treat an illness or restore a person's health. The price you pay is based largely on your insurance coverage. The best way to plan ahead for any costs is to:

Contact your health plan and ask what your out-of-pocket costs will be for an upcoming stay, or

Call Petersburg Medical Center's estimate team at 907-772-4291 to get an estimate for an upcoming service.

Petersburg Medical Center provides a list of our hospital most common charges below. Please note that these amounts are gross charges. We charge the same for all patients, but a patient's responsibility may vary depending on rates negotiated with health plans and your individual benefit coverage. Patients without insurance or who do not have enough insurance may qualify for financial assistance.

Pricing is organized into six categories of service as defined by the Centers for Medicare & Medicaid Services (CMS). They are as follows:

- Anesthesia
- Evaluation and Management
- Medicine
- Pathology and Laboratory
- Radiology
- Surgery

The description, procedure (CPT) code, and price of the 10 most common charges from each category are detailed over the next six pages of this document.
